

# PROJECT CONTROLS SERVICES

**Project Controls are critical to achieving successful project and programme outcomes. As project controls professionals, our role is to assure clients that project execution is organised, monitored and delivered in relation to cost and schedule goals.**

Our project controls services apply integrated and robust controls from a clear baseline to deliver confidence in programme and project performance. It combines the various elements of Project Controls to provide data clarity and to help make proactive, informed management decisions at the right time.

Our Project Controls professionals bring a wealth of experience in delivering project controls services across a diverse range of projects and sectors.

## WHAT ARE THE BENEFITS OF PROJECT CONTROLS?

- Helps to establish realistic project schedules and budgets & facilitates effective resource allocation and utilisation
- Enables better management of project risks and uncertainties
- Enables the identification and mitigation of potential issues and delays
- Promotes transparency and accountability in project management
- Provides a mechanism for monitoring and controlling project performance
- Facilitates effective communication and collaboration among project stakeholders
- Helps to ensure that project outcomes are aligned with organisational goals and objectives
- Enables better decision-making based on accurate and up-to-date project data.

## HOW DO WE DELIVER THE SERVICE?

Blueprint deliver project controls services through a structured process across the full project lifecycle.

We work closely with our clients to establish the objectives, develop detailed project plans, manage the project, and finalise project deliverables.

Throughout the entire process, Blueprint provide underpinned, impartial, and reasoned support to our clients, including guidance on project controls best practices, development and implementation of project controls procedures, and advice on risk management and quality assurance.

This approach helps to ensure that projects can be delivered on time, within budget, and to the required quality standards, while minimising risks and maximising opportunities.
